VIII<sup>th</sup> National Conference  
of  
BIOLOGICAL PSYCHIATRY  
AND  
PSYCHOPHARMACOLOGY

**CRAIOVA**  
**March 18-21, 2015**

Dear Colleagues,

With great pleasure I invite you to attend the National Conference for Biological Psychiatry and Psychopharmacology with International Participation that will take place in Craiova under the auspices of the World Federation of Societies of Biological Psychiatry.

Our Society promotes the statute and the role of Psychiatry as a medical specialty with a strong belief that disorder with a medical diagnosis cannot be treated in the absence of the physician. In the management of major psychiatric disorders, psychopharmacology remains the primary opportunity, without denying the contribution of non-biological therapies as indicated by psychiatrist.

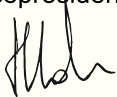

We expect a wide participation of psychiatrists, psychologists, residents and other professionals for sharing relevant scientific information and personal experiences at national and international levels.

The Conference will host educational courses, thematic symposia, plenary sessions and poster sessions with high scientific expectations.

We wait for you in Craiova to spend together a few beautiful and full days, with valuable contributions and as much communication as possible, in the best interest of ourselves and our patients.

With warm feelings

**Tudor Udristoiu**  
President, RSBPP  
Vicepresident, WFSBP
